技术规格

Background:	Basic helix-loop-helix (bHLH) transcription factors have been implicated in cell lineage determination and differentiation. The protein encoded by this gene is a bHLH transcription factor and shares similarity with another bHLH transcription factor, Dermo1. The strongest expression of this mRNA is in placental tissue; in adults, mesodermally derived tissues express this mRNA preferentially. Mutations in this gene have been found in patients with Saethre-Chotzen syndrome.
Applications:	ELISA, IHC
Name of antibody:	TWIST1
Immunogen:	Synthetic peptide of human TWIST1
Full name:	twist basic helix-loop-helix transcription factor 1

SwissProt:	Q15672
ELISA Recommended dilution:	2000-5000
IHC positive control:	Human colon cancer and Human liver cancer
