

兔抗 GYPC 多克隆抗体

中文名称：兔抗 GYPC 多克隆抗体

英文名称： Anti-GYPC rabbit polyclonal antibody

别名： GE; GPC; GPD; GYPD; CD236; PAS-2; CD236R; PAS-2

相关类别： 一抗

抗原： GYPC

储存： 冷冻 (-20℃)

宿主： Rabbit

反应种属： Human

标记物： Unconjugate

克隆类型： rabbit polyclonal

技术规格

Background:

Glycophorin C (GYPC) is an integral membrane glycoprotein. It is a minor species carried by human erythrocytes, but plays an important role in regulating the mechanical stability of red cells. A number of glycoprotein C mutations have been described. The Gerbich and Yus phenotypes are due to deletion of exon 3 and 2, respectively. The Webb and Duch antigens, also known as glycophorin D, result from single point mutations of the glycoprotein C gene. The glycoprotein C protein has very little homology with glycoproteins A and B. Alternate splicing results in multiple transcript variants.

Applications:	ELISA, IHC
Name of antibody:	GYPC
Immunogen:	Fusion protein of human GYPC
Full name:	glycophorin C
Synonyms :	GE; GPC; GPD; GYPD; CD236; PAS-2; CD236R; PAS-2
SwissProt:	P04921
ELISA Recommended dilution:	2000-10000
IHC positive control:	Human colon cancer and Human tonsil
IHC Recommend dilution:	100-300
