

兔抗 CHAT 多克隆抗体

- 中文名称：兔抗 CHAT 多克隆抗体
- 英文名称：Anti-CHAT rabbit polyclonal antibody
- 别名：choline O-acetyltransferase; CMS6; CMS1A; CMS1A2; CHOACTASE
- 相关类别：一抗
- 抗原：CHAT
- 储存：冷冻（-20℃）
- 宿主：Rabbit
- 反应种属：Human, Mouse, Rat
- 标记物：Unconjugate
- 克隆类型：rabbit polyclonal

技术规格

Background:	This gene encodes an enzyme which catalyzes the biosynthesis of the neurotransmitter acetylcholine. This gene product is a characteristic feature of cholinergic neurons, and changes in these neurons may explain some of the symptoms of Alzheimer's disease. Polymorphisms in this gene have been associated with Alzheimer's disease and mild cognitive impairment. Mutations in this gene are associated with congenital myasthenic syndrome associated with episodic apnea. Multiple transcript variants encoding different isoforms have been found for this gene, and some of these variants have been shown to encode more than one isoform.
Applications:	ELISA, IHC

Name of antibody:	CHAT
Immunogen:	Fusion protein of human CHAT
Full name:	choline O-acetyltransferase
Synonyms:	CMS6; CMS1A; CMS1A2; CHOACTASE
SwissProt:	P28329
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human thyroid cancer
IHC Recommend dilution:	25-100
