技术规格

Background:	SPATA5L1 (spermatogenesis-associated protein 5-like pr otein 1) is a 753 amino acid protein belonging to the A AA ATPase family and AFG2 subfamily. Single nucleotide polymorphisms (SNPs) present in SPATA5L1 at the glyci ne amidinotransferase (GATM)-SPATA5L1 locus have bee n found to correlate with glomerular filtration rate (GFR) , having significant implications for kidney disease resea rch. SPATA5L1 localizes to cytoplasm and exists as three alternatively spliced isoforms.
